

4th State Fusion

Flagship non-invasive 4th state plasma platform for licensed and trained providers.

OVERVIEW

4th State Fusion brings cold atmospheric, ozone, and warm argon-style plasma together so a practice can build a broad, non-invasive aesthetic menu without adding a device for every protocol. Every session is provider-led: parameters, applicator choice, and cadence are set by a licensed or trained professional following manufacturer training.

FEATURES

- **Multi-modality plasma delivery**
Cold atmospheric, ozone, and warm argon-style plasma on a single console, selected by the provider.
- **Controlled, non-ablative energy**
Delivered at controlled intensity for a comfortable, non-invasive session with minimal downtime.
- **Interchangeable handpieces**
Swap applicators between facial, scalp, and focal work without changing consoles.
- **Protocol consistency**
Repeatable parameter presets across appointments and operators.
- **All Fitzpatrick types**
Parameters adapted across Fitzpatrick I-VI at provider discretion.
- **Clinic-ready build**
Console form factor designed for treatment rooms and fast turnover.

APPLICATIONS

- **Appearance of skin firmness**
Supports the visible appearance of firmer, smoother skin.
- **Focal surface work**
Precise, provider-directed treatment of selected superficial cosmetic concerns.
- **Texture & scarring appearance**
Used within protocols aimed at uneven texture and older scarring.
- **Uneven tone**
Renewal-focused protocols for the appearance of uneven tone.
- **Scalp & hair programs**
Scalp-focused sessions within the CAP Fusion 8 hair program.
- **Comfort-first facials**
Gentle sessions suited to sensitive skin at provider discretion.

AT A GLANCE

Platform	Flagship multi-modality console
Modalities	Cold atmospheric, ozone, warm argon-style plasma
Positioning	Non-invasive aesthetic device
Operating temperature	Controlled, non-ablative
Intended operator	Licensed or trained professionals
Skin types	Fitzpatrick I-VI at provider discretion
Status	Patent pending

Professional use only. This is a non-invasive aesthetic device intended for use by licensed or trained professionals in accordance with applicable laws and manufacturer training.
